PROFILE

A highly motivated and enthusiastic Frontend web Developer with a strong love for creating visually appealing and user-friendly web applications. I possess a keen interest and proficiency in Search Engine Optimization (SEO) principles, enabling me to develop web solutions with enhanced discoverability and online visibility.

WEB PROJECTS

Mercado Libre E-Commerce clone
https://meliclon.netlify.app/ | React | CSS | Context | SwipperJS
A clone of the popular e-commerce platform. Using its API to perform interactivity and information managment. I have added an extra functionality for quick comparison of products to help the buyer in making decisions.

Typing Speed Game
https://typing-speed-game-1.netlify.app/ | React | CSS | Context | LocalStorage
An online game for desktop designed to enhance your typing skills and speed, tracking your progress and having fun trying to break your own record.

Fichas Médicas APP
https://fichasmedicas.netlify.app/ | React | CSS | Context | UseReducer
A CRUD web app that allows for patient registration, adding medical consultations, and keeping medical records up to date. Including validations when adding new patients and minimum necessary information.

EDUCATION

Technical degree in computer programming
National University Of Quilmes (UNQ), 2022 – present. Buenos Aires, Argentina
